

Prototype Shop/

Maintenance Leader

Automotive (m/f/d)

Tasks and responsibilities:

- Manage the prototype shop production
- Manage the prototype team and the maintenance team
- Schedule all the prototype production in agreement with the other factory departments (logistics, suppliers, maintenance)
- Assist production during start-up phases
- Maintain in order the whole prototype shop and the all maintenance facilities

Start of position: January 2019

Location: Almere, Netherlands

Your profile:

- You have a high school/college diploma or any relevant study experience in the field of mechanics and mechatronics
- 3 to 5 years of experience in mechanical construction or maintenance of engines, tools or any other mechanic or mechatronic equipment
- Attention to details and to safety
- Ability to read mechanical drawings and specifications
- Further training in the field of mechanical engineering is a plus
- A structured, independent and results-oriented working approach is required for this position
- Good skills in teamwork, coordination and communication
- Good written and spoken knowledge of English, German and Dutch are plus but not mandatory
- Microsoft Office user (average user level), SAP is a plus but not mandatory

We can offer you a position with a varied and challenging remit. You will work in an attractive environment and with a dedicated team. You will have the opportunity to apply your strengths as well as your potential and to actively shape the development of our company.

Are you interested in this varied position which offers you considerable potential and a high degree of personal responsibility? Then we look forward to receiving your full application, including your salary expectations.

Please do not hesitate to contact Ms. Manuela de Vries if you have any questions.
